### **DETAILED ACTION**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, drawn to a method of generating a database of molecular fragment data, classified in class 707, subclass 101. If this Group is elected then the below summarized specie election is also required.
- II. Claims 18-20 and 23-27, drawn to a method of determining a relationship between the presence of a number of molecular fragments in a number of molecular structures and a biological target characteristic of the molecular structure, classified in class 702, subclass 27. If this Group is elected then the below summarized specie election is also required.
- III. Claims 21, 22, and 28-31; drawn to a computer implemented method of generating predicted biological target characteristic data for a target molecule, classified in class 702, subclass 19.

### **SPECIE ELECTION REQUIREMENT FOR GROUPS I OR II:**

This application contains claims directed to the following patentably distinct species of the claimed invention:

Specie A: method embodiments which do not utilize graph theory to compare molecular fragment data

Specie B: method embodiments which do utilize graph theory to compare molecular fragment data

Graph theory is a specialized subject matter area which substitutes graphical representations and techniques for computational algorithms and is generally separately

published from computational algorithm methods and thus documents the separate and undue search burden if they are searched together.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-9 and 12-16 (Group I) and claims 18-20, 23, 24, 26, and 27 (Group II) are generic to Specie A and B in their respective Groups.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1631

The inventions are distinct, each from the other because of reasons set forth below and regarding specie distinctness as summarized in the above specie election explanation:

The inventions of Groups I, II, and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the different modes of operation, functions, and effects have been summarized above within each of the Group Descriptions.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
